PROFESSIONAL SUMMARY

Results-driven Data Analyst with 3 years of experience analyzing large-scale datasets and engineering scalable ETL pipelines using PySpark, Databricks, and SQL. Adept at leveraging an engineering background to automate workflows, optimize data validation, and orchestrate complex pipelines via Apache Airflow. Proven track record of transforming raw data into structured, reliable data models (Bronze-Silver-Gold architecture) to drive actionable business intelligence and real-time analytics.

CORE COMPETENCIES

Languages:	Python, SQL
Data Engineering:	ETL/ELT Pipelines, Data Validation, Data Cleaning, Delta Lake Architecture
Big Data & Streaming:	Databricks, PySpark, Apache Kafka
Cloud & Containers:	AWS (S3, Glue, Athena), Azure (ADLS Gen2, Synapse), Docker
Orchestration:	Apache Airflow, n8n
BI & Visualization:	Power BI, Advanced Excel
Key Strengths:	Technical Problem Solving, Cross-functional Collaboration, Pipeline Debugging, Data Quality Optimization

PROFESSIONAL EXPERIENCE

Data Processing Analyst – Indivillage Tech Solutions LLP	Dec 2022 – Jan 2025 Anantapur, India
- Analyzed large, complex structured datasets using Python and SQL to generate key business insights for stakeholder decision-making. - Developed, optimized, and maintained robust ETL pipelines within Databricks, significantly improving processing efficiency and infrastructure scalability. - Programmed automated data validation and data cleaning scripts, boosting overall data quality by ~30% and eliminating critical manual errors. - Collaborated closely with cross-functional engineering and business teams to streamline reporting workflows, reducing operational turnaround time by ~25%. - Built and deployed interactive Power BI and Excel dashboards, enhancing executive data visibility and reporting efficiency.	

TECHNICAL PROJECTS

Multi-Cloud Data Lakehouse Pipeline (Azure & Databricks)
- Designed and engineered an ELT pipeline utilizing Azure Data Lake Storage (ADLS Gen2) for raw data ingestion and Databricks for distributed transformation. - Implemented a Medallion Architecture (Bronze, Silver, Gold) using PySpark to clean, validate, and aggregate complex business data for end-users. - Connected Power BI directly to Azure Synapse Analytics and Databricks Gold tables to serve interactive sales and performance dashboards for stakeholders.

Serverless Data Analytics Workflow (AWS S3, Glue & Athena)

- Architected an automated data processing workflow on AWS to analyze large-scale customer behavior datasets.
- Utilized AWS Glue crawlers and serverless ETL jobs to extract raw CSV and JSON files from Amazon S3, applying schema enforcement and necessary transformations.
- Conducted exploratory data analysis (EDA) and ad-hoc querying using Amazon Athena and standard SQL, uncovering actionable trends that informed strategic marketing decisions.

Containerized Orchestration Ecosystem (Docker, Airflow & PostgreSQL)

- Deployed a localized data engineering environment using Docker Compose to securely isolate Apache Airflow, PostgreSQL, and pgAdmin containers.
- Engineered Directed Acyclic Graphs (DAGs) in Airflow to consistently extract public API data, perform Python-based Pandas transformations, and load the clean records into a PostgreSQL data warehouse.
- Generated localized data analysis reports by querying the Dockerized PostgreSQL database, validating high data integrity and end-to-end pipeline reliability.

EDUCATION

B.Tech in Mechanical Engineering	2022	Anantha Lakshmi Institute of Technology & Sciences
Diploma in Mechanical Engineering	2018	Government Polytechnic Anantapur
SSC (Secondary School Certificate)	2015	Shanti Vidya Nikethan EM High School

CERTIFICATIONS

- Python Programming - Udemy
- Databricks Certified Training - Udemy
- Generative AI Fundamentals - Udemy
